Outside Icing	32

White Mountain Refrigerators

"The Chest with the Chill in it"

Maine Duplex Ice Grate -
Aerated - Gleanable - Sanitary

The "Maine" Duplex Removable grate found exclusively in "White Mountain" Refrigerators constitutes at once the top of the germ proof provision chamber and the bottom of the ice reserve.

Men of Brains, the thinking men of the nation, one time forgot the cold problems of stocks and bonds and passed the famous "Pure Food Law." They found that the health of the nation, your health, and our health, and the health of our neighbors, could not be measured in dollars and cents.

But the "Maine" looked years ahead and gave to the world this famous "Duplex Grate," (illustrated above) the foundation of Purity in refrigeration.

The ice rests upon heavy rust-proof metal convex bars, slightly separated one from another then the melted ice drops into convex bars which lie between and beneath the convex bars and runs back through a slot in the heavy rim of the grate into a deep trough in the back of the ice compartment whence it passes through a sealed trap out of the refrigerator.

Don't be misled; this famous "Maine" Duplex removable ice grate is found exclusively in "White Mountain" Refrigerators. Ask your Doctor what he knows about "White Mountain" hygienic preservation.

White Mountain

“Pure Baked White”

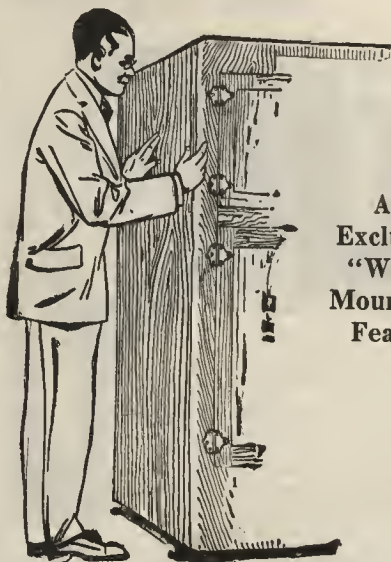

Did you ever feel so thoroughly pleased with something on which you've worked and studied month in and month out, that it just seemed impossible to express your extreme satisfaction? Well, that is just how we feel about our "Baked White."

We are proud of its purity, proud of its cleanliness, proud of its durability—justly proud of the thoroughness in which it has filled a long looked for perfect Snow White finish, a sanitary and lasting White surface for the provision compartment.

The Purity, Cleanliness, rich Lustre and Cold Gleaming White of the **Pure Baked White** provision chamber present that tone of individuality and perfection of Quality peculiar to everything "White Mountain" in scientific refrigeration. Recommended as superior in Sanitation to Porcelain, as it cannot check, chip, crack or scale, to leave rough sections for the accumulation of impurities.

White Mountain "Solid End"

An
Exclusive
"White
Mountain"
Feature

PIANO SOLID END

Which would YOU rather have on YOUR piano, a massive, smooth, plain, Solid End a full inch thick, or a frame holding together a series of panels three-eighths of an inch thick, with each cross-piece of frame forming a sill to catch dust?

Let's carry the thought further and suppose that inside the case there is ice instead of music, with the cold air fighting to get out and the warm air struggling to get in; that $\frac{3}{8}$ " panel strikes you as being decidedly thin, does it not?

“Exterior White”

PURE WHITE, INTERIOR and EXTERIOR

To get the smoothness, the depth and to produce a lasting lustre, exterior enameling requires five to seven “coats,” each thoroughly air-dried. This process means a large amount of material, ties up valuable floor-space for a solid week, and multiplies labor by labor,—hence the greater cost.

But the result is well worthy of its production, at least the “White Mountain” result—and we are justly proud of our “Exterior White.”

The “white exterior” completes the white kitchen, it beautifies the most elaborate white outfit, and carries the “White Mountain” mark of quality to the finest detail.

For detail of Stock Sizes, ask to see large catalog.

"White Mountain" Boot-Leg Water Cooler

COLD, CLEAN, HANDY, COMPACT.

The "White Mountain" Boot-Leg water cooler is lined with immaculate porcelain, so hard and smooth it cleans like china—and you easily reach every inch of the snow-white interior. No ammonia taste, no little bits of dirt, for the ice never touches the water. Not ice cold, but always a healthy, thirst-driving chill that lasts and pleases. Why open the ice door? No need of this as the cooler fills from outside, through the top, as shown in the picture. And remember "White Mountain" faucets never leak. Installed in side icing patterns only.

WHITE MOUNTAIN "OBLONG" COOLER

The "Oblong" water cooler is similar to the Boot-leg cooler; being constructed of the same material etc. The oblong water cooler is installed in "open top" and "household" patterns while the Boot-leg cooler is installed only in "Boston" or side icing patterns.

“White Mountain Grand”

Style Nos 202, 203, 204 and 205.

The “Open Top” pattern. Maximum sanitation, cleanliness, economy and convenience, durability and permanent beauty, guaranteed by this infallible combination of the best materials, scientific principles and expert workmanship. Every interior fitting removes. The **Pure Baked White** chamber cleans like china, and the Duplex grate insures coldness and purity. Massive, air-tight door and cover. Air-tight locks and hinges of bronze, nickel plated. “Mirror” finish of rich “Golden Oak.”

No.	Telegraph	Lbs. Ice	Length	Depth	Height
202	Acorn	55	24 in.	19 in.	43 in.
203	Advent	85	27 in.	21 in.	45 in.
204	Album	110	30 in.	22 in.	47 in.
205	Anchor	135	33 in.	23 in.	49 in.

“White Mountain Grand”

Style Nos. 648, 649, 650 and 651.

“Household” pattern, tall, deep, roomy; for city flat and apartment. Select material, finest workmanship and extreme care in every detail, produce a solid, substantial, sanitary, convenient and beautiful refrigerator.

Ice chamber equipped with famous “Maine” Duplex grate shown on Page 2. Massive “solid end” construction.

Massive solid ends double insulation, strength, durability and beauty.

Immaculate provision chamber finished in the Pure Baked White. Two shelves in No. 648.

No.	Telegraph	Lbs. Ice	Length	Depth	Height
648	Ash	90	25 in.	18 in.	50 in.
649	Axe	100	25 in.	19 in.	54 in.
650	Azure	110	27 in.	20 in.	57 in.
651	Amber	140	30 in.	21 in.	60 in.

Can be furnished with porcelain-lined water cooler, complete with faucet and cup-holder at small additional cost.

“White Mountain Grand”

Style Nos. 261, 262 and 263.

The “side-icing” pattern is the most popular refrigerator of today. Illustrated above is our beautiful “Boston” in the superb “White Mountain Grand.” Solid end construction. Largest provision space consistent with ice chamber—but keep latter well supplied. Lift out the Duplex grate, the strong gleaming shelves, the waste pipe with its automatic trap—cleanse thoroughly—replace; a cold, pure, sweet and glistening interior maintained with little care.

Nickeled bronze locks and hinges, massive and air-tight.

No.	Telegraph	Lbs. Ice	Length	Depth	Height
261	Intrinsic	50	30 in.	18 in.	40 in.
262	Intense	75	32 in.	19 in.	42 in.
263	Invite	100	33 in.	20 in.	47 in.

Can be furnished with porcelain-lined water cooler, complete with faucet and cup-holder at small additional cost

“White Mountain” Grand

Style No. 264.

This exact size is the largest “seller” in the entire “White Mountain” line—because experience has proved the provision space the best adapted to average family requirements. And the ice chamber is perfectly proportioned, insuring the highest degree of efficiency in refrigeration. We unhesitatingly recommend this No. 264. Baked White provision compartment.

Removable Duplex ice grate. Removable waste pipe with automatic trap. Woven wire shelves.

Solid Bronze spring locks and hinges, nickel plated.

No.	Telegraph	Lbs. Ice	Length	Depth	Height
264	Iron	125	35 in.	22 in.	50 in.

Can be furnished with porcelain-lined water cooler, complete with faucet and cup-holder at small additional cost.

“White Mountain Grand”

Style Nos. 265, 266, 267 and 268.

The magnificent Four-door “Boston”—sounds every tone of strength and beauty. Permanent snow-white interior by the infallible “Pure Baked White” process—a surface hard as flint, smooth as glass, sanitary and non-absorbent. Every fitting is strong, convenient, open and removable. Massive doors close absolutely air tight and are controlled by practically indestructible bronze hardware in polished nickel plate. Five shelves in 265 and 266, six in 267, and eight in 268.

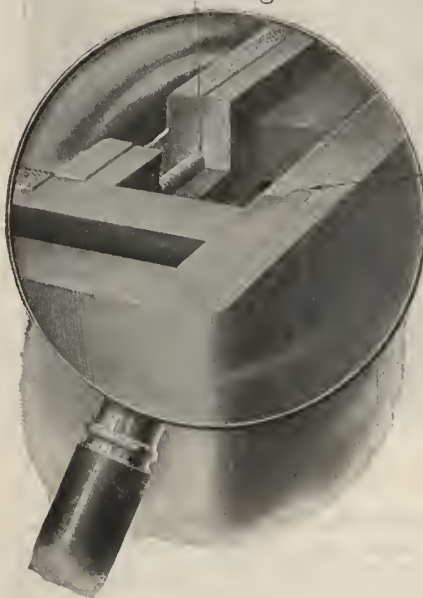

No.	Telegraph	Lbs. Ice	Length	Depth	Height
265	Image	150	36 in.	23 in.	52 in.
266	Ida	165	38 in.	23 in.	54 in.
267	Isabel	220	41 in.	24 in.	56 in.
268	Instruct	300	44 in.	26 in.	64 in.

Can be furnished with porcelain-lined water cooler, complete with faucet and cup-holder at small additional cost.

White Mountain

"Welded" Joining

Tongued and grooved joining
of inner lining

Tongued
and
grooved
joining
of
exterior
case

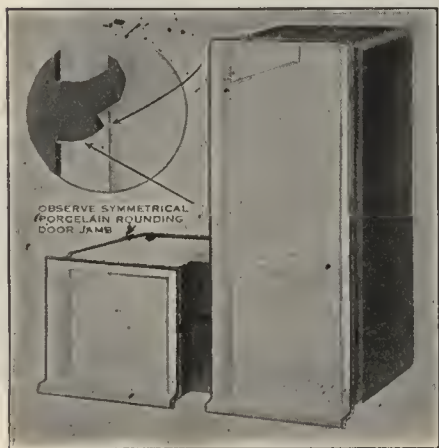

Joint executed
so finely as
to be hardly
visible without
aid of glass

We are now getting down to the subject of refrigeration, and there always is, or should be, an inner wall. How does the "White Mountain" extra-thick welded (heavy tongue and groove) wall appeal to you, as compared with a thin wall comprising separate square-edge pieces simply butted one against the other? The illustration showing our wall construction tells the story more clearly than written description—the joining of the Solid End is so perfectly executed that the effect is of one individual solid piece front to back and top to bottom.

White Mountain

"One-Piece Seamless"

Porcelain Refrigerators

Porcelain lined refrigerators as are being manufactured by us are unsurpassed by any other porcelain refrigerators on the market. With our new and patented "one-piece seamless" porcelain lining these refrigerators possess exclusive features found in no other porcelain refrigerators. The rounding door jambs, together with "pan" or "cup" doors and sanitary shelf supports leave no place in this refrigerator that is not quickly accessible, and easy to clean.

Added to these features is the fact that all of our porcelain refrigerators are equipped with the famous "Maine" Duplex removable ice-grate found only in the "White Mountain" which makes this line of refrigerators the last word in accessibility, cleanliness, and economy.

“White Mountain” Porcelain

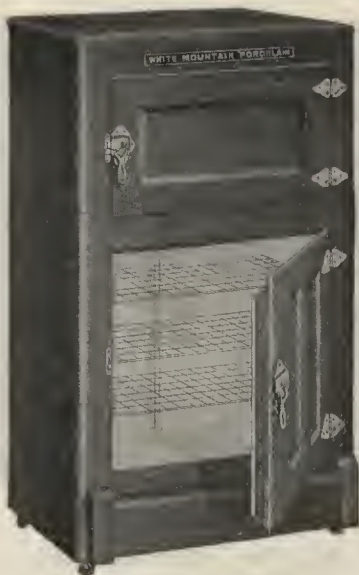

Style No. 704.

The “one-piece” porcelain provision chamber represents the highest degree of perfection in porcelain coating—based on heavy gauge metal. This high grade lining is only one of many strong features, for in this series is also found the absolute insulation, the Duplex circulation by the infallible “Maine” aerated grate, the expert joining of the solid-end exterior case, and the extra-thick tongued and grooved inner cabinet.

No.	Telegraph	Lbs. Ice	Length	Depth	Height
704	Waldo	110	30 in.	22 in.	47 in.

“White Mountain” Porcelain

Style Nos. 749 and 750.

In adding these two sizes in the “one-piece” porcelain provision storage, we have completely boxed the compass.

The “White Mountain” offers your choice of the **Pure Baked White**, the incomparable **Stone White** and the “one-piece” porcelain constructed along “White Mountain” lines.

The union of the “one-piece” compartment with the infallible “Maine” Duplex grate cannot be duplicated, and surely is not and cannot be equalled for efficiency in scientific refrigeration.

No.	Telegraph	Lbs. Ice	Length	Depth	Height
749	Washington	100	25 in.	19 in.	54 in.
750	Watertown	110	27 in.	20 in.	57 in.

Can be furnished with porcelain-lined water cooler, complete with faucet and cup-holder at small additional cost.

“White Mountain” Porcelain

Style Nos. 762, 763 and 764.
(3 shelves in 762 and 763)

We call special attention to this pearl-white, one-piece refrigerator lining—a solid one-piece food chamber built of steel, then heavily porcelainized under tremendous heat. A beautiful, durable, cleanable, sensible provision compartment—cleaned as easily as a china bowl. No other porcelain lining unites with the truly wonderful “Duplex” aerated ice grate used exclusively in the “White Mountain”—“*The Chest with the chill in it.*” “White Mountain” Refrigerators are always abreast of the times, and ahead of the times,—they always lead; they lead in sanitation, economy, convenience, in durability and in style and general appeal.

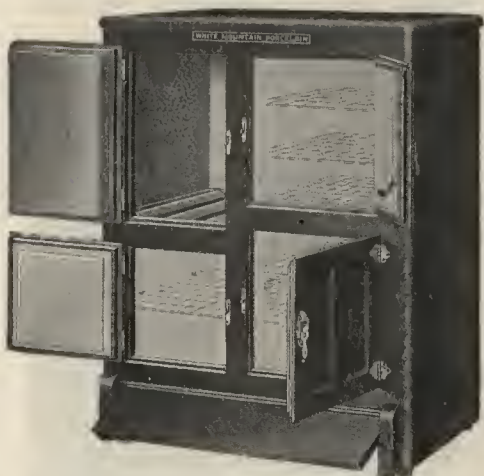

Case joined air-tight, with double-thick interior and exterior cabinets forming one great, durable unit. Massive Hardware of Solid Bronze in polished nickel finish.

Three shelves in No. 763 and four in 764.

No.	Telegraph	Lbs. Ice	Length	Depth	Height
763	Walker	100	33 in.	20 in.	47 in.
764	Walnut	125	35 in.	22 in.	50 in.

Can be furnished with porcelain-lined water cooler, complete with faucet and cup-holder at small additional cost.

“White Mountain” Porcelain

Style Nos. 765, 766 and 767.

In this four-door “Boston” is brought out to splendid advantage the contrast of the immaculate porcelain interior against the clean, clear finish of the massive case.

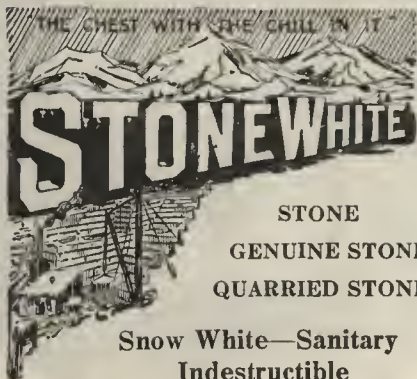

One great “one-piece” compartment, clean and cleanable, without the semblance of joining arrangement; and throughout every inch of it are driven strong currents of cold, dry, purifying and preserving air by the “Maine” Duplex grate.

Exterior and interior cases solidly knit by the “double-dovetail” method. Massive doors held air-tight by solid bronze trimmings finished in nickel plate. Nos. 765 and 766 have five shelves; six in No. 767.

No.	Telegraph	Lbs. Ice	Length	Depth	Height
765	Warsaw	150	36 in.	23 in.	52 in.
766	Waverly	165	38 in.	23 in.	54 in.
767	Wayne	220	41 in.	24 in.	56 in.

Can be furnished with porcelain-lined water cooler, complete with faucet and cup-holder at small additional cost.

Stone White Refrigerators
GENUINE QUARRIED STONE
WHITE AS SNOW

We use **Stone** to hold the chill from the ice chamber, to supplement the work of the ice, to store up a certain percentage of the low temperature derived from the circulating cold air and thereby use less ice to maintain the necessary low degree. The **Stone** chamber maintains an even low temperature, whereas anything with a metal base naturally demands extreme ice capacity and a full supply of ice at all times,—otherwise extreme variations result.

The uniting of the Solid Stone walls is so skillfully handled that the result is virtually one continuous sheet of Solid Stone—just as if the chamber were drilled out of a cube of solid rock.

Solid Stone—Quarried Snow White

Style Nos. 903, 904 and 905.

Our perfect "Stone White"—symbol of unyielding strength, absolute purity and the extreme in economy and convenience.

The breaking, cracking, checking, scaling, inability to maintain low temperature, and other unsanitary and costly elements peculiar to opal glass, tile and the numerous "compositions" are absolutely eliminated in the genuine Stone of the "Stone White". Note the new massive top.

There's only one Genuine Stone lining, and it is our "Stone White."

Massive Bronze Hardware in polished surface of nickel. A grand combination of Purity, Durability and Beauty.

No.	Telegraph	Lbs. Ice	Length	Depth	Height
903	Nook	85	30 in.	22 in.	45 in.
904	Nod	110	33 in.	23 in.	47 in.
905	Nova	135	36 in.	24 in.	49 in.

Solid Stone—Quarried Snow White

Style Nos. 948, 949, 950 and 951.

Our city apartment in "Stone White" excellence. Maximum sanitation, economy and convenience, maximum storage and cleanliness, guaranteed by this construction and this arrangement. An unyielding union of Solid Oak, Solid Rock and the vital principles of sanitary preservation and true economy. The wonderful cold-retaining properties of natural quarried stone, the permanent cleanliness and beauty of the immaculate white surface, the extreme of perfection in the ice regulating mechanism, and the unlimited convenience, insure all the finer qualities of scientific refrigeration. Two shelves in Nos. 948 and 949. Note the new massive top.

No.	Telegraph	Lbs. Ice	Length	Depth	Height
948	Notary	80	28 in.	20 in.	51 in.
949	Noble	95	28 in.	21 in.	55 in.
950	Noon	110	30 in.	22 in.	58 in.
951	Noise	145	33 in.	23 in.	61 in.

Can be furnished with porcelain-lined water cooler, complete with faucet and cup-holder at small additional cost.

Solid Stone—Quarried Snow White

Style Nos. 962, 963, 964 and 965.

The popular "Boston" in "Stone White" construction. Extra heavy end wall, extra interlinings for the massive doors, double-thick panels, rails and muntins, supplementary insulation, "solid end" and bolted construction,—all are vital features in the perfect OAK case—unqualified perfection.

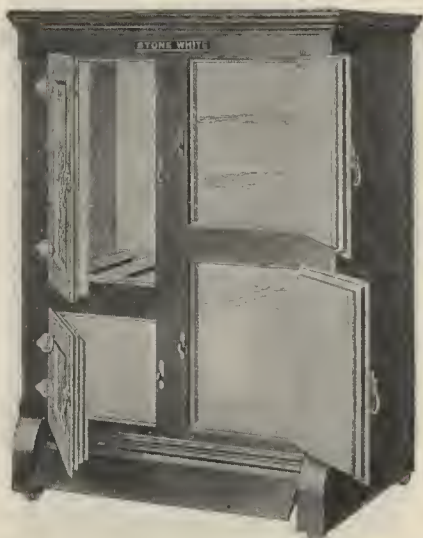

Extra large provision compartment of genuine Quarried Stone, easily kept cold, dry, pure, sweet and clean—sanitation—economy—cleanliness and convenience combined. Note the new massive top.

Three shelves in Nos. 962 and 963, four in 964 and five in 965.

No.	Telegraph	Lbs. Ice	Length	Depth	Height
962	Nap	70	33 in.	20 in.	43 in.
963	Nitre	100	35 in.	21 in.	47 in.
964	Norway	125	37 in.	23 in.	50 in.
965	Night	185	43 in.	25 in.	50 in.

Can be furnished with porcelain-lined water cooler, complete with faucet and cup-holder at small additional cost.

Solid Stone—Quarried Snow White

Style Nos. 965B, 966, 967 and 968.

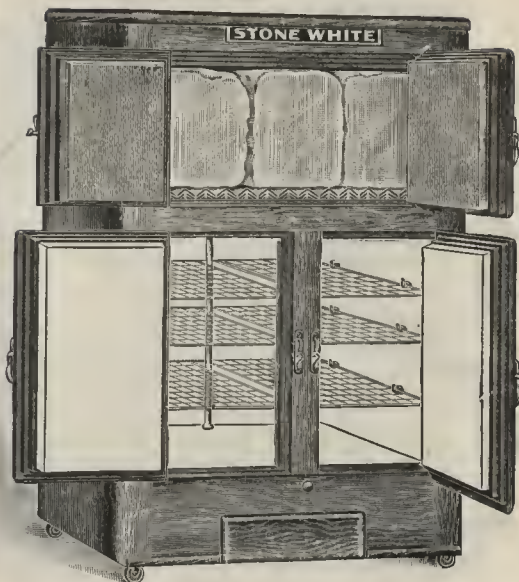

Four-door "Stone White," a true source of pride in the home where Quality is value. Artistic indeed are the lines of the massive, solid case of Oak. The provision chamber of Quarried Stone, its walls joined below the surface tight as an aquarium, is White as Snow, absolutely pure, and remains cold and sweet with smallest possible ice consumption. Every interior fitting easily removed for cleaning. A combination of strength, beauty and true quality in this union of Solid Quarried Stone, Selected Oak and the great steel ice compartment. Note the new massive top.

Five shelves in Nos. 965B and 966; six in No. 967, and nine in No. 968. Polished Bronze trimmings in nickel plate.

No.	Telegraph	Lbs. Ice	Length	Depth	Height
965B	Neutral	150	38 in.	24 in.	52 in.
966	Nugget	165	40 in.	24 in.	54 in.
967	Nozzle	220	43 in.	25 in.	58 in.
968	Nordica	300	46 in.	27 in.	66 in.

Can be furnished with porcelain-lined water cooler, complete with faucet and cup-holder at small additional cost.

Solid Stone—Quarried Snow White

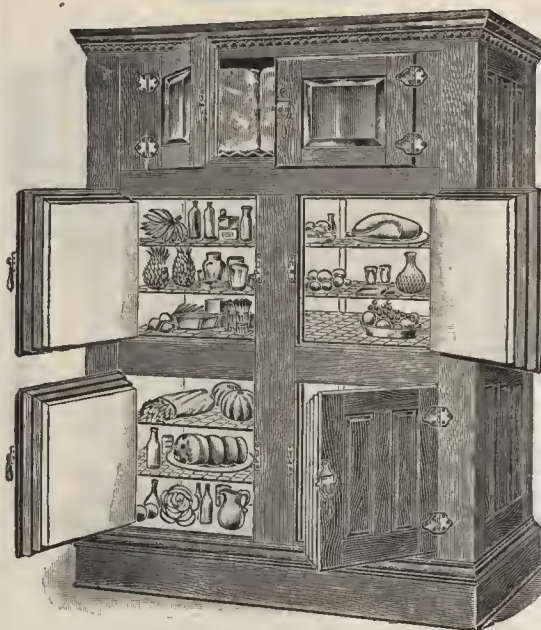

Style Nos. 919 and 920.

“Stone White” solidity, purity, economy and beauty “welded” in a grand unity meeting the requirements of the restaurant, hotel, small dairy and grocery, also for the larger residences. Into these massive “Stone Whites” are riveted the elements producing lifetime durability and economy. Everything to be desired in convenience of cleansing, icing or the storage of provisions, is offered in this size. The true economy of a large “Stone White” refrigerator is exemplified. Two shelves (side to side) in 919.

No.	Telegraph	Lbs. Ice	Length	Depth	Height
919	News	250	37 in.	25 in.	54 in.
920	Negro	325	42 in.	27 in.	62 in.

Solid Stone—Quarried Snow White

Style No. 910.

This grand "Stone White" represents supreme effort and unqualified success in providing that finest degree of perfection so essential in the highest grade dairy, grocery, restaurant and large hotel. The last ounce of patience, skill, material and the artistic, enters into this superb "stone-walled" storage.

The price is right—it is extremely low compared with the perfection in quality obtained. One great white lined chamber of cold, solid, sanitary Natural Stone—equipped with ten commodious shelves in triple plating of tin.

No.	Telegraph	Lbs. Ice	Length	Depth	Height
910	Nativity	425	52 in.	31 in.	77 in.

“White Mountain Grand”

Style Nos. 100, 200 and 300.

Solid Oak—for Retail Grocer's and Butter Dealers.

Cased in Solid Oak. One chamber equipped with automatic sliding butter shelf, giving an air-tight closing when shelf is pulled out, leaving butter outside without varying temperature within. Six great doors. Ice doors paneled with French mirrors. Wooden panels if preferred. Duplex grate, flues, waste pipe and sanitary wire shelves, all remove easily. Nos. 100 and 700 do not have butter shelf.

Nos. 400, 500 and 600 have two long chambers fitted with meat hooks. Nos. 700, 800 and 900 have one long chamber and two small chambers fitted with shelves.

No.	Telegraph	Lbs. Ice	Length	Depth	Height
100	Elephant	425	52 in.	31 in.	77 in.
200	Expand	510	58 in.	31 in.	79 in.
300	Embark	675	66 in.	32 in.	85 in.

For Pure White interior see Nos. 6100, 6200, 6300, 6400, 6500, 6600, 6700, 6800 and 6900 respectively, in large catalog.

“White Mountain”

Pine Refrigerators

PINES OF NEW HAMPSHIRE

Splendidly adapted to extreme variations in temperature or moisture, almost a self-insulator, retaining year after year a high, rich finish, and extremely tough and durable, the species of Pine used in our case will wear longer and better than most grades of carefully selected Hardwood. The same extra-heavy tongued and grooved wall construction, the same infallible insulation, and perfect cold, dry air circulation are retained year in and year out; a combination producing refrigeration that cannot be surpassed—economy that is economy in the truest sense of the word.

The immaculate provision chamber of the Pine in “Pure Baked White” is equipped with strong woven steel wire shelves in sanitary plating of tin.

“White Mountain” Pine

Style Nos. 601, 602, 602½, 603, 604 and 605.

Case is beautifully finished. Door and cover are thick, interlined, massive and close absolutely air-tight. Heavy guaranteed metal covers every inch of every wall in ice and provision chambers. Removable wire shelves, removable waste pipe. Every nook and corner easily accessible for cleaning. Massive Hardware. “Nickel Plated.” One shelf in No. 601.

No.	Telegraph	Lbs. Ice	Length	Depth	Height
601	Age	30	21 in.	18 in.	38 in.
602	Able	45	23 in.	19 in.	40 in.
602½	Ace	55	25 in.	19 in.	42 in.
603	Abyss	70	27 in.	20 in.	43 in.
604	Acute	100	30 in.	21 in.	45 in.
605	Ant	135	33 in.	22 in.	47 in.

Can be furnished with porcelain-lined water cooler, complete with faucet and cup-holder at small additional cost.

“White Mountain” Pine

Style Nos. 621, 622, 623 and 624.

We illustrate here our popular “Boston” pattern in the beautifully finished **Pine** case—combining the unlimited convenience of the side-icing arrangement, the economic and sanitary properties of **“White Mountain” “Duplex”** circulation, the purity, cleanliness and beauty of the **Pure Baked White** provision compartment, and the superb exterior casing of our **“New Hampshire” Pine**.

Equipped with sanitary, silver-like shelves of heavy steel wire in heavy plate of tin. Absolute insulation. Massive trimmings in nickel plate. Note the new massive overhanging “table” top. Three shelves in Nos. 621, 622 and 623; four in No. 624.

No.	Telegraph	Lbs. Ice	Length	Depth	Height
621	Invert	50	32 in.	19 in.	40 in.
622	Illume	75	34 in.	20 in.	42 in.
623	Ivory	100	35 in.	21 in.	47 in.
624	Ivan	125	37 in.	23 in.	50 in.

Can be furnished with porcelain-lined water cooler, complete with faucet and cup-holder at small additional cost.

“White Mountain” Pine

Style Nos. 626 and 627.

The Four-Door “Boston” in Pine will absolutely produce magnificent refrigeration if care is taken to keep the ice chamber well supplied, and the result will be obtained at lowest possible cost for operating a refrigerator of this size. Removable Duplex ice grate. Removable waste pipe with automatic trap. Note the new massive overhanging “table” top.

Five shelves in No. 626; six in No. 627.

No.	Telegraph	Lbs. Ice	Length	Depth	Height
626	Indict	165	40 in.	24 in.	54 in.
627	Iris	220	43 in.	25 in.	56 in.

Can be furnished with porcelain-lined water cooler, complete with faucet and cup-holder at small additional cost.

“White Mountain” Pine Chests

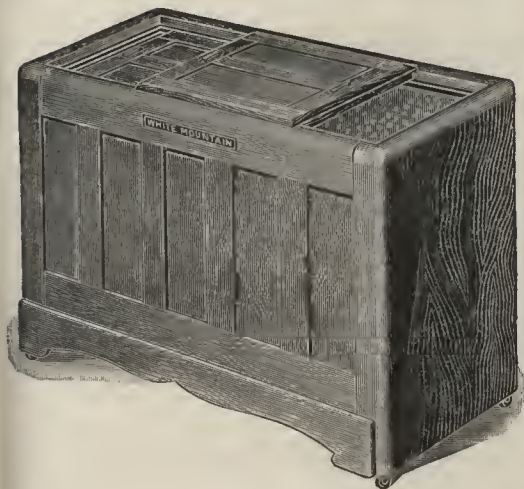

Style Nos. 6 and 8.

We show in section 36 our “White Mountain” ice chest in “New Hampshire” Pine case, handsomely finished. Joining and insulation are exactly the same as in our refrigerators. Fitted with heavy metal shelves and galvanized steel ice rack. Strong, quick-action casters. A solid, attractive chest at small cost, and will give splendid results.

No.	Telegraph	Length	Depth	Height
6	Shade	32 in.	22 in.	33 in.
8	Snow	36 in.	23 in.	35 in.

"White Mountain" Pine Chests

Style No. 10A.

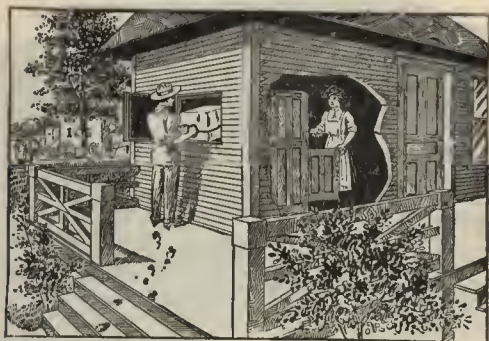

Our Pine chest with two independent, massive, air-tight, sliding covers. Individuality of design, unyielding strength and durability, utmost convenience and greatest economy are found in this steel-lined chest. The best-selling and most satisfactory medium-large ice chest in the market to-day. Indestructible, quick-action casters.

No.	Telegraph	Length	Depth	Height
10A	Sperry	40 in.	27 in.	37 in.

Our Hardwood Chest, same sliding cover pattern as above but different size, represents the best in Chest construction

No.	Telegraph	Length	Depth	Height
18	Spool	51 in.	30 in.	39 in.

“White Mountain” Rear Door

Outside Icing “THE BEST WAY”

Thinking—actual thinking—the study kind, is good for all of us. Think about the great freedom from old-time trails of dripping water and sawdust, tracks of the iceman's muddy boots, the daily interruption of our household work—free from all this by icing from out of doors, the adjoining shed or porch. Nowadays the architect plans this great convenience just as he allows for windows and other necessities.
